

## Move to the front of the class

# Cisco Meraki for K-12

Cisco Meraki has innovative solutions that lay the foundation for a more connected, secure, and sustainable future in education. With our broad portfolio and unmatched experience that spans networking, security, cloud, and IoT, we can deliver a complete suite of education solutions that securely connects students, educators, and administrators—anywhere, any time, and on any device—so learning never stops.

## See how customers leverage Cisco Meraki in their schools

### Achieve end-to-end network visibility

“With the intuitive, cloud-based dashboard we can give a high level of insight to our entire IT team. It saves us a lot of time.”

- Kevin Denton, Deputy Chief Technology Officer

### Secure student data and network access

“We are taking advantage of Cisco technology, so students stay safe, online and offline, and have an efficient, productive learning environment. At the same time, Cisco solutions create an environment that's significantly easier to manage and control.”

- Michael Leathers, Director of Information Services

### Create safer school grounds

“The MV smart cameras have helped tremendously by cutting down on time spent doing maintenance and increasing overall visibility into school environments.”

- Brian Borosh, Director of Technology

### Easily deploy to multiple schools

True zero-touch provisioning and ease of deployment helped the team refresh wired and wireless networks across 56 schools serving 30,000 students without impacting learning experiences.

### West Ada School District

Empowering a nimble IT department to deliver consistent wireless access to 40,000 students

### Saugus Union School District

Powering digital transformation with security, mobility, and simplicity.

### East Stroudsburg Area School District

Protecting students, staff, and grounds with smart spaces.

### Boulder Valley School District

Utilizing E-Rate funding to transition 56 K-12 schools to a simpler cloud-based network.

# Our 95% renewal rate makes the grade

## Onboard IT teams seamlessly

"As soon as I started teaching the dashboard to my IT teams and our field techs, they really liked it. They quickly gravitated toward using it. The simplicity of use makes them much more efficient in resolving connection issues."

- West Ada Senior Network Engineer Eric Frost

## West Ada School District

Simplifying IT operations and processes to minimize downtime.

## Streamline troubleshooting

"With our previous network solution, visibility was poor, and we were often having issues with troubleshooting. With Meraki, we have central control of the network without the need of on-prem controllers and dedicated teams."

- Brad Merchant, Senior Technical Services Officer

## Catholic Education, Diocese of Wagga Wagga

Enabling efficient troubleshooting across remote and on-site teams with visibility, built-in tools, and metrics.

## Support Bring-Your-Own-Device (BYOD) Strategy

"ISC is striving to be a leader in technology-based education, and the Meraki platform works hand-in-hand with that goal."

- James Brightman, Director of ISC

## International School Carinthia (ISC) Velden

Delivering reliable bandwidth and speed to support 800 connected devices

## Get reliable, continuous network performance and insights

"The consistent and automated updates of all of the wireless access points, switches, and firewalls have really helped us maintain and ensure that our systems are up-to-date on a continuous basis ... Meraki has helped keep us secure and has been easy-to-manage in all-in-one solution."

-Todd Wiler, Network Engineer

## Columbus Metropolitan Library

Bridging the digital divide with secure, reliable Wi-Fi made affordable through E-Rate discounts.

## Support sustainable operations and healthy environments

"There is potential for greater cumulative carbon and financial savings from extending the technology across all WCBC schools and other corporate buildings. The Meraki and partner engagement has also provided insights into the hourly air quality, noise level, temperature, and humidity in teaching spaces across schools."

- Max Wheelock, Climate Change and Carbon Reduction Officer

## Wrexham County Borough Council

Harnessing IoT to reduce costs, save energy, and improve air quality across 70 schools.

## Improve the learning experience

"The introduction of Meraki has brought about numerous benefits that have undeniably enhanced educational outcomes for both staff and students. These reliable, modern, and effective Meraki networks have played a pivotal role in this transformation."

- Matthew Murton, Senior ICT Account Manager, ICT Services

## Government of South Australia, Department for Education

Transforming staff and student experiences by streamlining 725 separate networks across South Australia.
